

SUMMARY

Computer Science undergraduate passionate about Artificial Intelligence, Machine Learning, and Data Science with hands-on experience in developing intelligent applications using Python, TensorFlow, Scikit-learn, OpenCV, and SQL. Skilled in data analysis, deep learning, computer vision, and Generative AI, with a growing focus on Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and AI automation. Strong analytical, leadership, and problem-solving abilities, demonstrated through academic projects, internships, and IEEE leadership experience.

EDUCATION

•Bachelor of Technology in Artificial Intelligence and Data Science	2023-27
Vimal Jyothi Engineering College,Chemperi,Kannur	CGPA: 8.82
•Higher Secondary Education	2021-23
GHSS Neeleswaram,Mukkam,Kozhikode	percentage: 98%
•Secondary Education	2021
GHSS Neeleswaram,Mukkam,Kozhikode	percentage:100%

- PROJECTS
- LAWLLAMA

LEGAL BASED AI CHAT BOT USING RAG AND TRANSFORMERS. Project – Flask + BART + FAISS RAG + Groq/LLaMA 3.3

•IMDB-RATING-ANALYSIS

This project analyzes a dataset of 1,000 movies to identify trends and insights in genres, ratings, revenue, and other key factors while demonstrating data cleaning, analysis, and visualization using Python libraries such as Pandas and Matplotlib.

•IEEE-ML-Projects

contains four end-to-end Machine Learning projects developed during the IEEE AI/ML/DL Internship Program.

– Groups mall customers by Annual Income and Spending Score using K-Means and Hierarchical Clustering. Provides interactive cluster visualizations and business insights.

– Predicts whether a patient is at risk of diabetes from 8 clinical health parameters. Includes probability score, risk meter, and health recommendations.

– Detects plant diseases from leaf images using a trained Convolutional Neural Network. Provides disease diagnosis and treatment suggestions.

– Predicts Data Science salaries based on job role, experience level, employment type, company size, and remote work ratio.

•HEART-FAILURE-MODEL

Heart Failure Prediction using Machine Learning This project focuses on predicting the likelihood of a heart failure event using a clinical dataset. It leverages supervised machine learning techniques to analyze key health indicators and identify patterns associated with heart failure outcomes.

POSITION OF RESPONSIBILITY

•Vimal Jyothi Engineering College	2023 Sep -2027 July
Leadership skill	
– Collaberated with team on engineering project and design task. – Engaged in hands on experiment to test engineering concept and theories. – Prepared technical documentation and reports for team reviews. – Developed model using mathematical principles to simulate system behavior.	
•IEEE SB VJEC,IEEE CIS SBC VJEC	2026 Mar - 2027 Mar
Design Lead	
– Developed design processes to enhance efficiency and ensure high quality output. – Lead design projects for students initiatives and community outreach program. – Assisted in managing projects timeline and resource allocation for design tasks.	
•IEEE RAS SBC VJEC	2025 Mar - 2026 Mar
Design Lead	
– Developed design processes to enhance efficiency and ensure high quality output. – Lead design projects for students initiatives and community outreach program. – Assisted in managing projects timeline and resource allocation for design tasks.	

TECHNICAL SKILLS AND INTERESTS

Languages: C, Python, Java, R, SQL

Libraries : NumPy,Pandas,Scikit-Learn,Matplotlib,Scipy,Seaborn,XGBoost,PyTorch,TensorFlow,Keras,Hugging Face Transformers,FastAPI,spaCy

Web Dev Tools: Jupyterlab, VScode, Git, Github

Frameworks: Hugging Face,scikit-learn,Apache Spark

Cloud/Databases: Relational Database(mysql)

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Object Oriented Programming, Database Management System, Data science,Machine learning,Deep learning,GEN AI,Agentic AI.

Areas of Interest: GEN AI engineer,Machine Learning Engineer.

Soft Skills: Problem Solving, Self-learning, Presentation, Adaptability

EXPERIENCE

•**Lead 2 week AI,ML,DL internship** for B Tech students under IEEE SB VJEC "AI ARCADE" summer course *July 2026*

- I had the opportunity to guide students through the fundamentals and practical applications of Artificial Intelligence, Machine Learning, and Deep Learning.
- Throughout the internship, students successfully developed real-world projects, strengthened their problem-solving abilities, and gained hands-on experience with modern AI tools and technologies.

CERTIFICATIONS

- **IBM** – Data Analysis Using Python
- **IBM** – Data Fundamentals
- **IBM** – Big Data Foundations – Level 1
- **Microsoft Learning** – Get Started Building with Power BI
- **LinkedIn Learning** – Artificial Intelligence Foundations: Machine Learning
